

AlfaTour

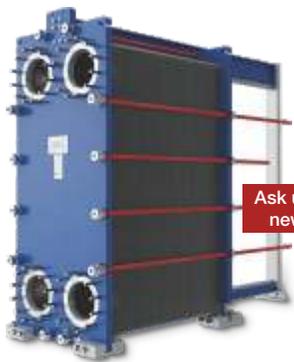

Mobile showroom

Driving innovation

Alfa Laval offers a complete range of innovative heat transfer and separation products for the process industries. Based on your application, the AlfaTour mobile showroom was outfitted with the unique products shown here.

Gasketed plate heat exchangers

Alfa Laval GPHEs are available in a wide range of models and provide efficient heat transfer in flexible, compact designs that are easy to service and maintain.

Innovative plate designs

Each Alfa Laval plate heat exchanger range includes meticulously engineered plate designs and configurations that ensure optimal performance.

Spiral heat exchangers

Exceptional compactness and self-cleaning design make Alfa Laval spiral heat exchangers extremely versatile in heavy fouling applications.

Compabloc

The compact, all-welded Alfa Laval Compabloc heat exchanger is used for heat recovery and is ideal as a condenser and reboiler in corrosive, high temperature operating environments.

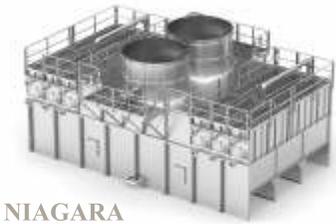

DuroShell

The all-welded DuroShell heat exchangers offer exceptional thermal performance and fatigue resistance—ideal for high pressure, high temperature and corrosive applications.

AlfaNova

The 100% fusion-bonded stainless steel AlfaNova provides the highest levels of performance and corrosion resistance when compared to brazed heat exchangers.

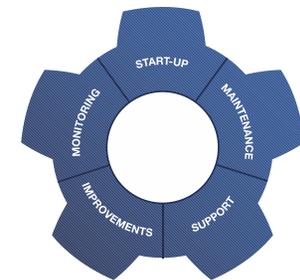

Wet Surface Air Coolers

Alfa Laval Niagara Wet Surface Air Coolers are closed loop process coolers that offer an efficient method of water usage for exceptional direct cooling of rugged industrial processes.

Air Cooled Exchangers

Alfa Laval ACE Air Cooled Exchangers offer superior cooling for upstream, midstream and downstream applications – commonly used in gas compression and gas processing.

Service

Our experienced team of local Service Advisors will support you throughout the lifecycle of your equipment. We don't just fix your equipment; we optimize its performance. #TrustedAdvisor

Alfa Laval in brief

Alfa Laval is a leading global provider of specialized products and engineered solutions.

Our equipment, systems and services are dedicated to helping customers to optimize the performance of their processes. Time and time again.

We help our customers to heat, cool, separate and transport products such as oil, water, chemicals, beverages, foodstuffs, starch and pharmaceuticals.

Our worldwide organization works closely with customers in almost 100 countries to help them stay ahead.
